

## Patient Testimonials

“I had a bout with breast cancer a couple of years ago, and I was put on a medication that causes thickening of the uterine lining, which can be a precursor to cancer.

I saw Dr. Cardosi, and he performed an exam, but couldn't say with any certainty if there was cancer present.

Knowing there was a risk because of my age and family history, though, I opted to have a hysterectomy just to be safe. That's when Dr. Cardosi told me I might be a candidate for a single-site robotic procedure.

No one wants to have scars – or more scars than necessary – so I decided to take his advice and try the single-site.

The quick recovery was what amazed me the most. I had surgery on a Monday, and then I spent the night in the hospital and was back home the very next day. By Friday, I had stopped taking my pain medicine. They went through my belly button, and there's such a minimal scar that you'd never know I had a hysterectomy.”

– Donna, age 53

“Having a hysterectomy performed with robotics was a piece of cake. I had the surgery and ten days later I was flying to visit my daughters. I thank God he led me to Dr. Cardosi, and gave him the skills to know what to do. It was done with a single little incision over my belly button, and the scar is already disappearing. I was back on my feet in three days. I'd recommend single incision robotic surgery to anyone.”

– Mary Powers, single-incision robotic hysterectomy patient, age 71

“I've worked in the medical field for many years, so I was very familiar with robotic surgery prior to my hysterectomy procedure. I found the procedure to be great. I went into the hospital on a Monday for the surgery, and I went back home the very next day. I was back to my regular routine within a week, and back at work within two weeks. I healed up very well with no issues at all. I felt blessed to have been Dr. Cardosi's patient. His entire team was very courteous and informative.”

– Sherrill Hickman, robotic hysterectomy patient, age 54

Dr. Richard Cardosi received positive comments in a recent Lakeland Regional Medical Center patient satisfaction survey: “I have a wonderful doctor: Dr. Richard Cardosi.”

Dr. Richard Cardosi received positive comments in a recent Lakeland Regional Medical Center patient satisfaction survey: “Dr. Cardosi is a good doctor who fixed me up real good. Thank you Dr. Cardosi!”
