ENHANCE YOUR Image AND YOUR Confidence

Men and women seek the services of a plastic surgeon for a variety of reasons. Some wish to reverse the effects of aging, refine the appearance of a particular feature, or improve the overall aesthetic quality of their face or body. Others require procedures that restore function, such as those who suffer from some form of physical deformity.

Whether you desire non-invasive cosmetic rejuvenation, or a more involved surgical procedure, the end result should boost not only your image, but your sense of self-confidence as well. No matter what your plastic surgery needs may be, you should seek the consultation of a professional who is board-certified and possesses extensive training and experience in the field.

With more than 20 years of experience in plastic surgery, board-certified plastic surgeon Dr. Faeza R. Kazmier provides a variety of services ranging from cosmetic procedures to reconstructive care. She works in close collaboration with her patients to achieve the natural, functional, and more youthful appearance they desire for their face or body.

From her office in Suite B of the beautiful Watson Clinic Women's Center, Dr. Kazmier works in harmony with their team of expert breast cancer surgeons when the severity of a cancer removal procedure demands immediate reconstruction to the breast. She lends her expertise right then – during the original breast cancer surgery, allowing for a faster recovery and a smoother psychological and physical transition to a normal life.

Are You Eligible?

Cosmetic surgery is performed to reshape normal structures of the body in order to improve an individual's appearance and self-esteem. Cosmetic surgery is usually not covered by health insurance because it is elective. Reconstructive surgery is performed on abnormal structures of the body, caused by birth defects, developmental abnormalities, trauma, infection, tumors or disease. In general, surgery is performed to improve function, but may also be done to approximate a normal appearance. Reconstructive surgery is generally covered by most health insurance policies, although coverage for specific procedures and levels of coverage may vary greatly.

There are a number of "gray areas" in coverage for plastic surgery that sometimes require special consideration by an insurance carrier. These areas usually involve operations which may be reconstructive or cosmetic, depending on each patient's situation. Schedule a consultation today to learn about your options.
