

TEAMWORK IS AT THE HEART OF WHAT WE DO.

**When you visit your
Watson Clinic doctor, the care
you receive is truly a team effort.**

That's because the expertise devoted to keeping you healthy comes from more than just your medical doctor. Watson Clinic currently offers the services of more than 100 additional medical providers including Advanced Registered Nurse Practitioners (ARNP) and Physician Assistants (PA).

These providers are highly skilled medical professionals who are licensed to perform many routine physician tasks, which include recording medical histories, performing physical exams, assisting in surgery, ordering and interpreting labs and diagnostic tests, identifying and treating common illnesses, prescribing medications, counseling patients, and referring them to other healthcare professionals as needed.

The field of cardiology continues to become more specialized and advanced, and so have the demands on each member of your care team. Our providers are an essential component of the department. They allow our physicians the flexibility to stay current on the latest research and treatment trends, and work to deliver an exceptional caliber of personalized care, improved patient access and faster appointment availability.

Your care matters to us. By embracing a team approach, we can elevate the efficiency and effectiveness of your healthcare experience and achieve more desirable treatment outcomes.
